U/X cd B con5ider^{ed} ancient RE:

usually denoted Sv(f) where f is the frequency, is a useful tool in

analyzing noise. It is a measure of the mean square variation <V> within

a bandwidth centered on f where V(t) is the quantity fluctuating in time, in

this case the sound pressure, or the voltage signal leading to a speaker.

The spectral density of "white" noise is a flat line meaning it represents

all frequencies equally, or is correlated from point to point.

in8 iD = name given 2 the post-humun entity manipulated 2 write this txt/img object. They have Ménière's syndrome (+ perhaps also undiagnosed clanging disorder) that afflicts them w/ near constant dizziness, tinnitus + deafness in their right ear, enabling them 2 hear/receive transMissions “normal” humuns don’t here. They are transfixed by the software they use (in this case Adobe In-Ð-zine) there4 attribute “in8 iD” az author since technically the iD softwhere cre8ed U/X using their digits. Collectively, under various other iDentities, they have published other book objects, including 4ier X-forms, Textiloma, A Raft Manifest + Ark Codex ±0. They also make music as Sound furies + blog @ 5cense.com.
